

Imagine that you are now in the year 2112 and looking back at the 21st seminar. If you were to put a label on the last 100 years, what would it be?

Tectonic shift of values and paradigms

The century of biology

Change

Shame

Humanity went from egoism to collaboration and thus managed to create a sustainable society

The most decisive 100 years in history

From Consumerism to sustainability

We did it!

Fast development in many areas

Sustainable Growth

The green revolution changed the world

Explosion of energy & non-sustainable growth

The downfall of an arrogant culture of growth

Happiness

Continuously accelerating development

Reconstruction years

Transformation of the cities
