

# in100

**- STARTING NOW**  
REWORKING SUSTAINABILITY AND GROWTH

SEMINAR #3 / PROGRAM 2-3 NOVEMBER 2011

## **NO FIXES, PAL!**

ON NATURE, SCIENCE AND TECHNOLOGY

### FUTURE MIND TOURS, BÜRO REISENDE

Future Mind Tours travels within the human body and mind in order to dive into the conscious and subconscious. Through generations our special technique has been explored and evolved and we are now the proud owners of a Subtronic Model 645©. This allows us to investigate your inner human landscape on the most comfortable journey and almost without any complications. However, sometimes our presence might manifest as disturbances\*. The most sublime outcome of this journey is a mind shift in the specific Reisende potentially resulting in a shift in paradigms in the external social landscape.

\*Subject-reports state following symptoms: Overwhelming inspirations, headaches, moments of spontaneous enlightenment, symbolically loaded dreams, hallucinatory shivers, stutters, butterflies in the stomach, incredible teamwork, memory loss, fever, diarrhea and inexplicable rashes. If you experience symptoms that are not listed here please report back to Future Mind Tours, Büro Reisende.

## STARTING NOW. IT'S IN THE AIR!

2112 ...

### Dear visionary,

The seminars in the project "In100years" cover different themes and issues, and they all have great participants. None of you, we believe, will settle for good, but go for great. Reworking the concepts of sustainability and growth is a complex task, and the seminar themes and participants are progressively adding to and expanding the resulting sum of knowledge – and questions, too. At the same time the series of seminars is designed with the aim of progressively narrowing the infinite space of futures, to articulate a few scenarios that represent distinctly different possible and preferred futures. Visions which can form a basis for present planning and action. A so called *backcasting* process.

Unavoidably, given the project's time frame of 100 years, there are still many open questions after the first two seminars. We have moved from a highly abstract high-level discussion of ideas and approaches at seminar 1 through considering barriers and opportunities for practical models for business and policy at seminar 2. At seminar 3, we are going to focus on actions and initiatives that are already being taken – with the future in mind. These are the seeds that the future will grow from, and they come in many forms as does the future. It all depends on the mindsets of people, organizations, institutions and countries. Basically of you and we.

We will be looking for the future in the present at this third seminar. Especially as it is embedded in technology, science and nature, a dynamic ecosystem of scientists, practitioners and technological paths, often competing. The thesis underlying the project is that we cannot go on, and we cannot go back. We face the challenge of transforming our system in order to sustain human development and the earth's resources, and that is a great challenge. But one common thread to the views and discussions at the previous seminars has been that we are well aware of this – at least we know enough to act. At seminar 3 we will look at such actions in the form of present developments with sustainable growth/development as striking point. These are the seeds of the future, the acorns on the ground.

### Yours sincerely,

House of Futures

ABOUT THE PROJECT:

## IN 100 YEARS

### What

The project "In 100 years – starting now" is developed and will be facilitated by House of Futures during 2011-12. The project will explore and debate questions such as:

- How can we sustain, develop and enrich human existence given the limited resources available on planet Earth?
- What does it take to co-create sustainable societal growth/development in the long run?
- And what are the preferred futures?

### Why

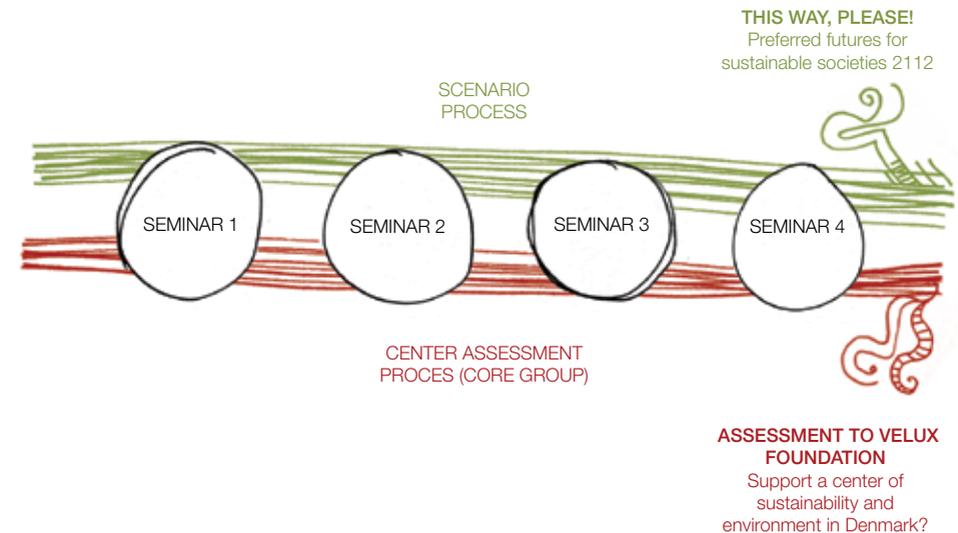

"In 100 years – starting now" has two overall purposes. The first is to develop and present alternative visions for sustainable societies to the general public and to decision makers in the public and private sector. The second purpose is an assessment of whether and how the VELUX FOUNDATION should support the establishment of a center for environment and sustainability in Denmark. A core group of high profile Danish experts will follow the four seminars and based on a parallel backcasting process give their recommendations to the foundation in the Spring of 2012.

### How

Four Copenhagen Seminars will play a central role in re-working the agenda of sustainability and growth/development. The first seminar will focus on "sustainable growth", the second on "policy and business models", the third on "nature and technology" and the fourth on "people and mindsets". The seminars are independent events yet also form part of a scenario process running the course of almost a year. We use futures studies methods in a 100 year scope combined with performance art to frame the necessary and preferred transformations and futures.

The process will involve 200+ inter-disciplinary experts and thinkers, who will rework and co-create visions of sustainable futures. After the four seminars House of Futures will present two preferred futures for sustainable societies 2112. Our vision is that this project will make a unique Scandinavian contribution to the global debate on how we can "meet the needs of the present without compromising future generations".

READ MORE ABOUT "IN 100 YEARS – STARTING NOW" AT [WWW.IN100Y.DK](http://WWW.IN100Y.DK)

MEMBERS OF THE CORE GROUP ARE:

**Steen Hildebrandt**, Ph.D, Professor, Institute of Leadership, Aarhus University.

**Carsten Rahbek**, Professor at Biological Institute, Ecology and Evolution, Director of Center for Macroecology, University of Copenhagen.

**Claus Stig Pedersen**, Senior Director, Head of Sustainability Development, Novozymes, and Adjunct Professor at Aalborg University.

**Ole Fogh Kirkeby**, Professor at Institute for Management, Politics and Philosophy, Copenhagen Business School.

**Thomas Færgeman**, Director of the independent green think tank CONCITO.

**Karen Blincoe**, Founder and Leader of The International Centre for Creativity, Innovation and Sustainability (ICIS) and Chairman of Danish Designers.

**Peder Andersen**, Head of the Environmental and Natural Resource Economy Research Group, Institute of Food and Resource Economics, University of Copenhagen.

**Camilla Bjerre**, Graduate student, Center for Forest and Landscape, Faculty of Life Sciences, University of Copenhagen.

ABOUT THE SCENARIO PROCESS:

## WORK IN PROGRESS

The overall conclusions from seminar 1 in the project In100Years, held 8-9 June, can be summed up in three statements: We need positive visions of a sustainable future, we have to integrate knowledge from various fields of research and expertise, and we need a shift of mindset. These statements have been central to our first draft of two preferred futures scenarios for sustainable societies 2112 presented at the second seminar.

Both scenarios are based on evolving the understanding of the relationship between humans and nature. It's about consciousness and mind shifts. Will we apply and refocus our present capacity to cope with the challenges (Man-Made World), or will we develop and manifest a more basic understanding of life and nature (the Power of Nature).

At seminar 2 the scenarios were presented verbally and as sensed futures giving the participants the opportunity to reflect and discuss the two different scenarios. Giving the two fundamentally different ways to sustainability many participants pointed at combinations of two to be the preferred way. At seminar 3 we will qualify the

two original scenarios further as well as looking for combinations of the two.

Outlining and creating the scenarios towards 2112 is a work in progress until after the fourth and final Copenhagen Seminar in January 2012. During all four seminars inter-disciplinary experts, thinkers and decisions makers, will rework and co-create visions of sustainable futures. After each seminar House of Futures analyses the contributions made by participants, continuously developing the scenarios between the seminars. In this work, and at the seminars as well, we will continue to focus on the long run and systemic transformations. We will also maintain the unconventional, interdisciplinary and comprehensive approach in the co-creation process with the seminar participants.

*Read more at [www.in100y.dk](http://www.in100y.dk)*

SKETCH OF SCENARIOS TOWARDS 2112

### #1: MAN-MADE WORLD

Geologists, biologists and climate scientists are telling us that Earth's metabolism is changing significantly, and that human activities are the main driving force behind this. We realize that when we put our minds to it, we can develop technologies, organizations, political institutions and business models that allow us to prosper in ways that do not jeopardize the planet. Collectively, we are approaching a state of global stewardship in which we manage our planet rationally, like any sensible landowner would his property.

### #2: THE POWER OF NATURE

We are part of the world – we are ONE. The global family share a common biology and collective consciousness, and we know we are rooted in nature. On a deeper level, these are sources of meaning that we all tap into, regardless of nationality or culture. Some stress our common DNA, the laws of nature, evolution and our dependence on Earth's ecosystems. Some draw on religious imagery of an almighty Creator. And some rely on ancient wisdom and myths, emphasizing commonality and civility among humans. Mankind is maturing and tends to become an integrated organic part of the world's ecosystem.

SEMINAR #3 / PROGRAM 2-3 NOVEMBER 2011

## NO FIXES, PAL!

ON NATURE, SCIENCE AND TECHNOLOGY

**2 NOVEMBER, 8:30-17:00.** Skovskolen, Skov & Landskab, University of Copenhagen, Nødebovej 77A, 3480 Fredensborg (parking in front).

08:00 Check in and light breakfast.

09:00 Intro by Steen Svendsen and Gitte Larsen, House of Futures.

### FIRST SESSION: BUILDING SUSTAINABLE SOCIETIES

09:20 VAUGHAN LINDSAY (UK): **DARTINGTON – A SOCIAL EXPERIMENT**

Vaughan Lindsay is CEO of Dartington Hall Trust, which focuses on three areas: Art, Sustainability and Social Justice. Vaughan Lindsay thinks he is privileged to be part of an organisation whose purpose is to experiment. "These are big issues that we got to address as a society, and we believe we have something to offer to those areas", he says in the Dartington video at YouTube. Dartington are a social enterprise and works closely with *Totnes*, the role model of more than 300 Transitions Towns world wide. Vaughan Lindsay will talk about his visions for Dartington now and in the long run.

09:40 SØREN HERMANSEN (DK): **HOW TO GET THE GREEN ENERGY GOING**

Søren Hermansen is Director at Samsø Energy Academy. It took 10 years to get the island where it is today producing 140% wind energy and thereby exporting renewable energy to the mainland. Samsø has amassed a great deal of practical experiences with the implementation of a broad variety of local renewable energy projects, from wind turbines to CO2 neutral district heating plants, rapeseed oil tractors and solar energy panels. Søren is awarded for his remarkable doings internationally. Listen to his passionate story about how he and a few others made it happen, and what the Energy Academy will do next.

*Short break followed by debate starting with comments by panelist Niels Johan Juhl-Nielsen, Omstilling Danmark, which is part of the Transition Towns Movement, and by panelist Anne Grethe Holmsgaard, Chairman Gate21 and former member of the Danish Parliament.*

### SECOND SESSION: IT'S IN THE AIR!

11:00 Introduction to **Acorn Falls** by House of Futures.

11:15 FUTURE MIND TOURS: **ACORN FALLS, IT'S IN THE AIR!**

Experience the mysterious city of Acorn Falls inhabited by Future Mind Tours. Start by getting a map that will make the invisible visible at *The Thresholds of Acorn Falls*

(see map in this program to find it). Walk and talk, sense and smell, get lost and found. Don't forget to report back, pal! And do pass the audit to get lunch on your way, please.

12:00-12:45 **Standing lunch in front of the audit.**

### THIRD SESSION: NATURAL SCIENCE IN THE LONG RUN

13:00 CARSTEN RAHBEK, VIDEO (DK): **BIOLOGY TOWARDS 2112**

Carsten Rahbek is professor at Department of Biology, Copenhagen University and director of Centre for Macroecology (CME). His main personal research interests are patterns of species distribution, species range sizes, species assemblages, species richness and what determines such patterns. His recent research focus has been on the issue of climate change and biodiversity, and he does not think that the main problem for the Danish and European species is climate change. Already there is hardly any space left, where nature exists on its own terms. Climate change "just" amplify the negative effects that we humans have imposed on the habitats. And for 99% of the world's species we do not know how they will be affected by rising temperatures. Carsten is also a member of the Core Group of the project *In100years*.

13:10 KATHERINE RICHARDSON (DK): **THE PLANET WE CALL "HOME"**

Katherine Richardson is Professor in biological oceanography at the Faculty of Natural Science at University of Copenhagen and is convinced that natural science must contribute to sustainable solutions. This conviction is, in part, based on Katherine's experiences as head of the Danish Climate Commission, where natural science and economic disciplines were brought together to identify how Denmark can build a sustainable energy future. Katherine was also part of the scientific support team for the 3rd. Nobel Laureate Sustainability Symposium in May 2011 where it was argued that it is our new natural science knowledge of the Earth System and how humans impact it that gives us the power (and the responsibility) to change our relationship with the planet and its resources. Katherine will share her views of how this relationship between man and nature will need to transform in order for us to have a home in 100 years.

*This session is followed by a few questions from the participants and pairwise conversations about the relationship between man and nature towards 2112.*

14:00 **Coffee/tea, cake and fruit.**

### FINAL SESSION: TECHNOLOGICAL AND POLITICAL PATHWAYS

14:15 WES JACKSON, VIDEO (US): **THE ROOTS THAT WILL SAVE CIVILISATION**

Wes Jackson is Founder of the Land Institute in Kansas, and according to him we need to listen more carefully to how nature works. If you do that, you are able to discover the roots that will save civilisation. Watch more on [in100y.dk](http://in100y.dk).

14:25 MARTIN FLURI (DK): **DESIGN PHILOSOPHY OF THE 21ST CENTURY**

Martin Fluri is Director of Cradle to Cradle Denmark. Since 2008 he and his partner Søren Lyngsgaard have been hooked on spreading the C2C design of productions methods. C2C started out as an environmental design philosophy – and it is continuing developing as such – and today it is also becoming an attractive business model for foresighted companies. Learn about two of their current development projects: C2C passports for Maersk's new Triple-E ships and their containers and a C2C building manual for the Danish building industry supported by Real Dania.

*Comments on how technology can help us create a sustainable society by panelist Lilli Sønder Jensen, Cluster Biofuels Denmark, and part of the team developing Kalundborg Industrial Symbiosis, and panelist Claus Stig Pedersen, Head of Sustainability Development, Novozymes.*

15:15 MARTIN LIDEGAARD (DK): **POLITICAL VISIONS – STARTING NOW**

Martin Lidegaard is the Danish Minister for Climate, Energy and Buildings. He will talk about his visions for a green future – including the 100 years' perspective – and about the role of politics in creating sustainable societies. Martin Lidegaard was chairman of the green think tank Concito and member of the Core Group of the project *In100years* before appointed Minister by the recently elected new government.

16:00 **Outtro** by Steen Svendsen and Gitte Larsen, House of Futures.

-17:00 **Visit Acorn Falls** and/or have a glass of wine/beer outside the audit.

## EVENING PROGRAM

FOR SPEAKERS AND PARTICIPANTS 3 NOVEMBER ONLY

18:30 **Dinner at “Gæstekantinen” at Skovskolen**

21:30 **“The Hourglass Inn” is open**, and there is still something in the air!

Watch the videos from seminar 2 (day 1 and day 2) at [www.in100y.dk/videos/video-seminar-2/](http://www.in100y.dk/videos/video-seminar-2/)

**3 NOVEMBER, 8:30-16:00.** Skovskolen

07:30 Breakfast for sleep-overs at “Gæstekantinen” (guest canteen)

08:30 Coffee and light breakfast at the audit

09:00 **Introduction** to the day by House of Futures.

09:15 CINDY FREWEN WUELLNER (US): **imagining urban futures**  
Cindy F. Wuellner is an architect and futurist. She is working with images, archetypal myths and alternative futures of cities.

09:30 KAREN BLINCOE (DK): **Sustainable cities – 3 examples**  
Karen Blincoe is founder and leader of The International Centre for Creativity, Innovation and Sustainability, Chairman of Danish Designers and member of the Core Group of the project “In100years”.

09:50 Questions and comments.

10:00 **Starting now – two parallel working sessions:** At the morning working session we will discuss the urgent questions and possible mindshift that we need to consider and address now. We will work from two perspectives: Sustainability on the premises of man (“Urban Minds & Landscapes”) versus on the premises of nature (“Mind of nature”).

### 1. Urban Minds & Landscapes

*Chair:* Cindy F. Wuellner (US)

### 2. Mind of Nature

*Chair:* To be announced

11:30 Working groups meet in **plenum debate** led by Steen Svendsen.

12:15 **Lunch and coffee in the “Kåte”.** Walk through Acorn Falls, sit down and have lunch and coffee/tea. Steen Svendsen and Søren Steen Olsen will present the draft scenarios for 2112 before you will discuss them in pairs on your way back to the audit.

14:00 **Scenarios towards 2112.** Plenum session lead by Steen Svendsen and Søren Steen Olsen, House of Futures. Key questions: What are the preferred future scenarios for sustainable societies? What are the fundamental and the winning agendas in the transition?

15:30 **Closing ritual** in the city of Acorn Falls **by Future Mind Tours,**

16:00 Time to say goodbye ...

PHOTO: MAJA AUGUSTA GJELSTRUP DYREBOERG

### **IT'S IN THE AIR! WELCOME TO ACORN FALLS**

We invite you to Acorn Falls where there's always something in the air, and the old oak tree stands firm as the spine of our daily lives. These days there are blowing some strange winds, and questions are being asked in the corners of this mysterious city, like "what is the final blow that makes an acorn fall?", "where does it land?" and "who picks up the acorn?".

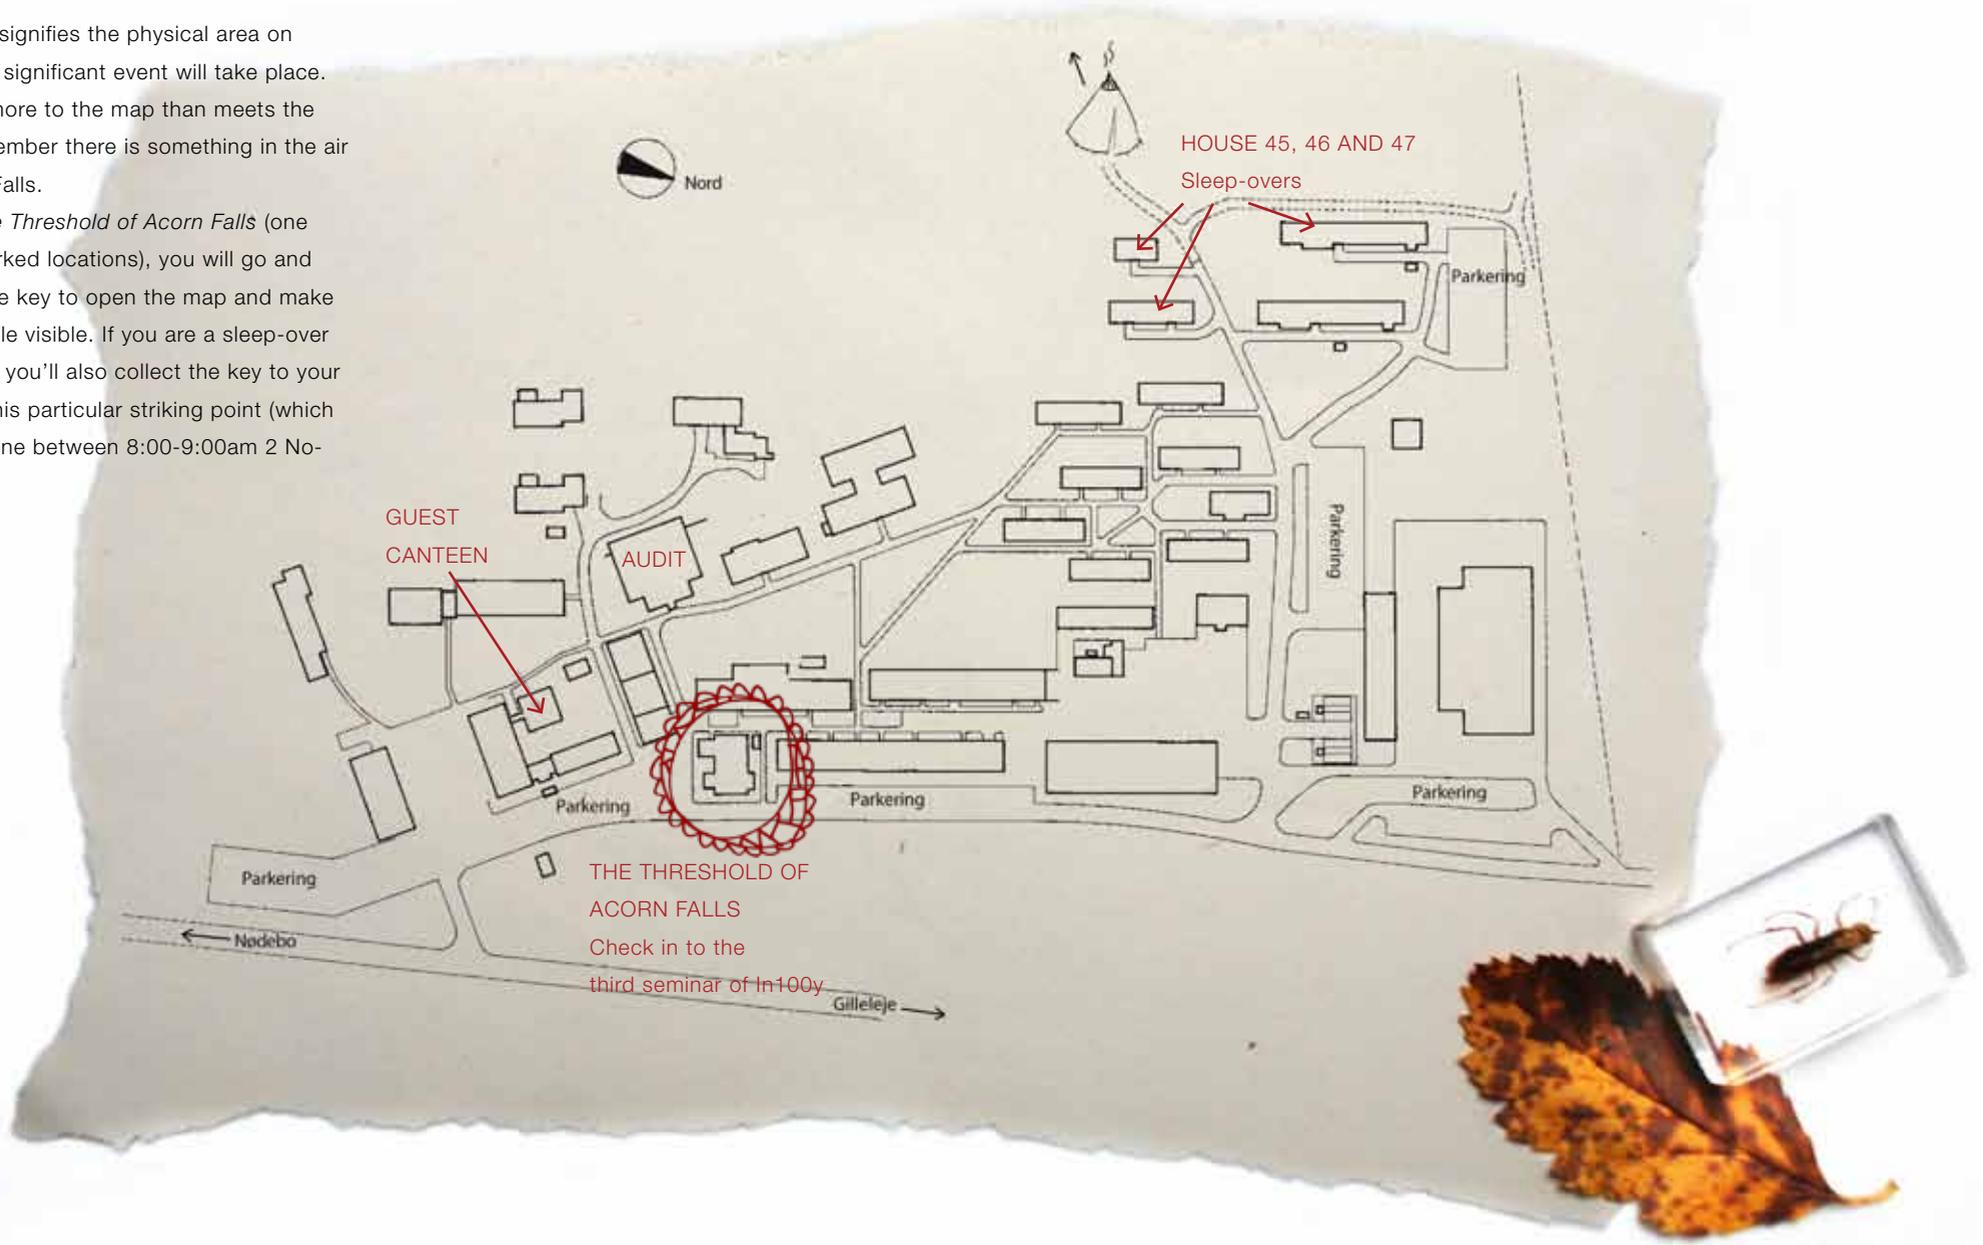

Future Mind Tours have travelled together with you, the re-  
sende of In100Y, into the significant event which takes place in  
Acorn Falls, starting now! We are visitors from 2112 and we are  
here to let you know that there are different pathways to the fu-  
ture. Because as we say in Acorn Falls: "The future's in an acorn"

ACORN FALLS IS A TAILOR-MADE PERFORMANCE INSTALLATION OF IN100Y BY FICTION PIMPS/  
HOUSE OF FUTURES MANIFESTED THROUGH "FUTURE MIND TOURS". HOUSE OF FUTURES ARE  
COMBINING FUTURE STUDIES METHODS WITH PERFORMANCE STRATEGIES IN ORDER TO CREATE  
SIGNIFICANT SEMINAR EVENTS. READ MORE AT IN100Y.DK

ACORN FALLS 2-3 NOVEMBER 2011

This map signifies the physical area on which the significant event will take place. There is more to the map than meets the eye. Remember there is something in the air in Acorn Falls.

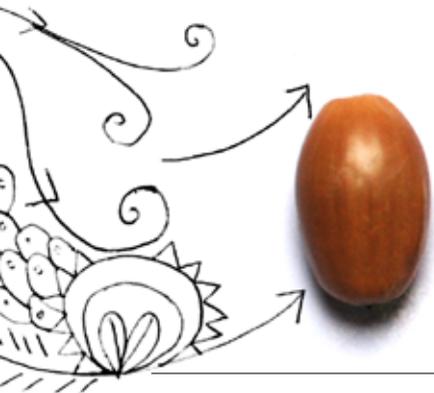

At *The Threshold of Acorn Falls* (one of the marked locations), you will go and receive the key to open the map and make the invisible visible. If you are a sleep-over inhabitant you'll also collect the key to your room at this particular striking point (which can be done between 8:00-9:00am 2 November).

PARTICIPANTS 2-3 NOVEMBER 2011

## **NO FIXES, PAL!**

COPENHAGEN SEMINAR #3, SKOVSKOLEN, UNIVERSITY OF COPENHAGEN.

COPENHAGEN SEMINARS 2011-12:

#1, 8-9 JUNE 2011, BORUPS HØJSKOLE

### **MIND THE LONG RUN, BABY!**

#2, 21-22 SEPTEMBER 2011, LIFE, UNIVERSITY OF COPENHAGEN

### **DOING GOOD, THANKS!**

#4: 18-19 JANUARY 2012, PLACE TO BE ANNOUNCED

### **IT'S OUR FUTURE, LOVE!**

For seminar programs visit [www.in100y.dk](http://www.in100y.dk)

PARTICIPANTS 2 NOVEMBER:

Andrew Todd, MA in Architecture and English Literature, founder of Studio Andrew Todd (F)  
Anna Lise Mortensen Grandjean, Head of secretariat Danish Council for Sustainable Development  
Anne Louise Carstens, Global Platform Facilitator, Mellempfolkeligt Samvirke/ActionAid Denmark  
Anne Grethe Holmsgaard, Chairman of Gate21  
Aske Tybirk Kvist, Intern at CONCITO  
Astrid Kann-Rasmussen, member of the board, VKR Foundation/USA  
Camilla Bjerre, Graduate student, University of Copenhagen (member of CG\*)  
Cecilie Bach Johansen: Vice Chairman, Aarhus Sustainability Network  
Christian Ege, Director, The Ecological Council  
Christian Poll, Environment and blogger about green lifestyle, Danmarks Naturfredningsforening  
Cindy Frewen Wuellner, Futurist and Architekt (US)  
Claus Homann, Head of department, Operations and Maintenance, Aarhus Vand A/S  
Claus Stig Pedersen, Senior Director, Head of Sustainability Development, Novozymes (member of CG\*)  
Eli Døllerup Nielsen, Assistant Manager, Biosa Danmark ApS  
Erik Hagelskjær Lauridsen, Senior Researcher, DTU Management Engineering Department of Management Engineering, Innovation and Sustainability, Technical University of Denmark  
Erik Nielsen, Executive Director, Biosa Danmark ApS  
Erling Halfdan Stenby, Head of Department, DTU Chemistry, Technical University of Denmark  
Finn Arler, Department of Planning, Division of Technology, Environment and Society Aalborg University  
Hans Kann Rasmussen, Chairman VELUX FOUNDATION  
Hans Peter Jensen, member of the board VELUX FOUNDATION  
Helene Bjerre Jordans, Head of Environment Programme, VELUX Foundations  
Jacob Fuglsang Mikkelsen, Artist & Creative Director, CO2 E - Race/The Danish Cultural Institute  
Jacob A. Sterling, Head of Climate and Environment, Maersk Line, A.P. Møller-Maersk  
Kathrine Richardson, Professor in Biological Oceanography and Vice Dean for Public Outreach, Faculty of Science, University of Copenhagen  
Karen Blincoe, Founder and Leader of The International Centre for Creativity, Innovation and Sustainability and Chairman of Danish Designers (member of CG\*)  
Kenneth Olwig, Professor, Department of Landscape Architecture, Planning and Heritage, Swedish University of Agricultural Sciences (DK/SE)  
Kjeld Juel Petersen, CEO, VELUX Foundations  
Klavs Birkholm, editor-at-large  
Kurt Emil Eriksen, Active House, VKR Holding A/S  
Lea Schick, Ph.D. Fellow, IT University of Copenhagen  
Lars E. Kann-Rasmussen, Chairman VILLUM FOUNDATION  
Laura Tolnov Clausen, Department of Environment, Social and Spatial Change, Roskilde University  
Lilli Sander Jensen, Phd, Cluster Biofuels Denmark  
Laura Watts, Assistant Professor, International Network for Social Studies of Marine Energy (ISSMER), IT University of Copenhagen

Martin Fluri, Director Cradle to Cradle Denmark  
 Martin Manthorpe, Director of Strategy and business development, NCC  
 Martin Spang Olsen, MA and polyhistor  
 Michael Wolffhechel, Project Manager, CO2 E - Race/The Danish Cultural Institute  
 Michael Minter, Head of Communication and Project Manager, Concito  
 Michael Zwicky Hauschild, Professor, section manager, DTU Management Engineering Department of Management Engineering, Technical University of Denmark  
 Mona Jensen, Project assistant, The Danish Board of Technology, and Member of Illutron  
 Niels Elers Koch, Professor and Director of Forest and Landscape, LIFE, University of Copenhagen  
 Niels Johan Juhl-Nielsen, Omstilling Danmark  
 Peder Andersen, Ph.D., Professor and Head of the Environmental and Natural Resource Economics Group, University of Copenhagen (member of CG\*)  
 Pernille Kallehave, Head of Development, Interdisciplinary Centre for Organizational Architecture (ICOA), Consultant to the dean (Sustainability), Business and Social Sciences, Aarhus University  
 Peder Agger, Prof.Em. biology, former head of Danish Council of Ethics, Chairman of Planning Committee in The Danish Society for Nature Conservation  
 Poulaine Middleton, Blogger, Zebra Productions  
 Rasmus Ejrnæs, Ph.D. in Biology, Section leader for Biodiversity & Conservation, Aarhus University  
 Rikke Dalsgaard, consultant, Dalsgaard A/S  
 Susanne Bøg, Brand strategy, VELUX A/S  
 Søren Hermansen, Leader of Samsø Energy Academy  
 Søren Lyngsgaard, Director and business developer, Cradle to Cradle Denmark  
 Søren Mark Jensen, Project Manager, Nature Agency, Ministry of Environment  
 Søren Winther Lundby, Chief Executive Officer, GlobalCitizen  
 Thomas Færgeman, Director of the independent green think tank CONCITO (member of CG\*)  
 Tove Enggrob Boon, Senior Researcher, Forest & Landscape, LIFE, University of Copenhagen  
 Ulf Boman, Futurist, Kairos Future (S)  
 Wendy Schultz, Futurist, Infinite Futures (UK)

*From House of Futures:* Madeleine Kate McGowan, Gry Worre Hallberg and Inga Gerner Nielsen (Future Mind Tours), Flemming Wisler (communication and PR), Stine Skøtt Olesen (documentation), Søren Steen Olsen (futurist), Steen Svendsen (futurist) and Gitte Larsen (futurist).

*Future Mind Tours assistants:* Line Loklindt (performance artist), Louise Yaa Aisin (performance artist), Iwona Reimus (performance artist) og Sarah Volante (performance artist). Dokumentation: Majken Midtgaard

\* CG = Core group. For information about CG see page 5.

For updated lists of participants visit [www.in100y.dk](http://www.in100y.dk) and download the program.

PARTICIPANTS 3 NOVEMBER:

THE ART OF GETTING ON / Develop and outline scenarios for sustainable societies in the long run from different scientific, professional and personal perspectives.

### **Working session: Urban Minds & Landscapes**

Andrew Todd, MA in Architecture and English Literature, founder of Studio Andrew Todd (F)  
 Cindy Frewen Wuellner, Futurist and Architect (US) (chair)  
 Dominic Balmforth, Director, Susturb ApS  
 Erik Hagelskjær Lauridsen, Senior Researcher, DTU Management Engineering Department of Management Engineering, Innovation and Sustainability, Technical University of Denmark  
 Lilli Sander Jensen, Ph.D., Cluster Biofuels Denmark  
 Martin Manthorpe, Director of Strategy and business development, NCC  
 Martin Fluri, Director Cradle to Cradle Denmark  
 Mona Jensen, Project assistant, The Danish Board of Technology, and Member of Illutron  
 Ole Fogh Kirkeby, Professor, Dr.phil., Department of Management, Politics and Philosophy, Copenhagen Business School (member of CG\*)  
 Klavs Birkhom, editor-at-large  
 Hans Kann Rasmussen, Chairman VELUX FOUNDATION  
 René Karottki, Sustainable Development Partners  
 Thomas Færgeman, Director Concito  
 Ulf Boman, Futurist, Kairos Future (S)

### **Working session: Mind of Nature**

Astrid Kann-Rasmussen, member of the board, VKR Foundation/USA  
 Camilla Bjerre, Graduate student, University of Copenhagen (member of CG\*)  
 Christian Ege, Director, The Ecological Council  
 Erling Halfdan Stenby, Head of Department, DTU Chemistry, Technical University of Denmark  
 Helene Bjerre Jordans, Head of Environment Programme, VELUX Foundations  
 Kathrine Richardson, Professor in Biological Oceanography and Vice Dean for Public Outreach, Faculty of Science, University of Copenhagen  
 Karen Blincoe, Founder and Leader of The International Centre for Creativity, Innovation and Sustainability and Chairman of Danish Designers (member of CG\*)  
 Michael Minter, Head of Communication and Project Manager, Concito  
 Niels Johan Juhl-Nielsen, Omstilling Danmark  
 Peder Agger, Prof.Em. biology, former head of Danish Council of Ethics, Chairman of Planning Committee in The Danish Society for Nature Conservation  
 Rasmus Ejrnæs, Ph.D. in Biology, Section leader for Biodiversity & Conservation, Aarhus University  
 Søren Hermansen, Leader of Samsø Energy Academy  
 Søren Mark Jensen, Project Manager, Nature Agency, Ministry of Environment  
 Wendy Schultz, Futurist, Infinite Futures (UK)

For updated lists of participants visit [www.in100y.dk](http://www.in100y.dk) and download the program.

**“IN100YEARS”  
IS SUPPORTED BY  
THE VELUX FOUNDATION**

**A SPECIAL THANKS TO:**

**Martin Lidegaard.** Martin was member of the Core Group of In100years until this October he became the Danish Minister of Climate, Energy and Buildings. He is former Chairman of the green independent think tank Concito. Thomas Færgeman, Director Concito is now member of the Core Group. In100Y/House of Futures welcomes you both!
